MAIL DATE

DELIVERY MODE

05/28/2009

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/595,243	Applicant(s) BROCK-FISHER, GEORGE	
	Examiner JOSEPH T. PHAN	Art Unit 2614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 March 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-22 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-22 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 29 March 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claims 1-22 rejected under 35 U.S.C. 102(e) as being anticipated by Fu et al., Pub.**

No. US 2002/0169584 A1.

Regarding claim 1, Fu teaches a portable medical monitoring apparatus comprising:
a portable monitoring device(20 Fig.1) for medically monitoring to detect an occurrence of a predefined abnormal condition(paragraph 0026-0027); and
a wireless transmitter attached to the device(20-25 Fig.1) and configured for automatically, wirelessly and directly communicating the occurrence to a portable phone (30 Fig.1 and para 0027) upon detection by the device of said occurrence, the phone being configured to make an emergency call upon receiving the communication(para 0028-0029).

Regarding claim 2, Fu teaches the apparatus of claim 1, wherein the monitoring is of a subject(10 Fig.1) the device being attached to the subject during the monitoring(10-20 Fig.1 and para 0026-0028).

Regarding claim 3, Fu teaches the apparatus of claim 1, wherein the phone comprises a Bluetooth device(para 0027), said apparatus further comprising a Bluetooth device configured for said communicating with the Bluetooth device of the phone(para 0027).

Art Unit: 2614

Regarding claim 4, Fu teaches the apparatus of claim 1, further comprising the phone, said phone having an automatic dialer(para 0026), the phone being configured to, upon said receiving the communication -activate the automatic dialer to call a particular phone number(para 0028-0029).

Regarding claim 5, Fu teaches the apparatus of claim 4, wherein the phone is further configured to play a pre-recorded message on the call when the call is answered(para 0029 and para 0034).

Regarding claim 6, Fu teaches a portable medical monitoring system comprising: a portable monitoring apparatus for medically monitoring to detect an occurrence of a predefined abnormal condition(Fig.1 and paragraph 0026-0027); and a portable phone(30 Fig.1) having an automatic dialer(para 0026) and configured to, upon detecting of said occurrence by said apparatus, activate the automatic dialer(para 0026) to call a particular phone number, the phone being further configured to play a prerecorded message on the call when the call is answered(para 0028-0029).

Regarding claim 7, Fu teaches the system of claim 6, wherein the apparatus is configured to communicate said detecting of said occurrence automatically, wirelessly and directly to the phone(25 Fig.1 and para 0027).

Regarding claim 8, Fu teaches the system of claim 6, wherein the monitoring is of a subject, the device being attached to the subject during the monitoring(10-20 Fig.1 and para 0026-0028).

Regarding claim 9, Fu teaches the system of claim 6, wherein the phone comprises a Bluetooth device(para 0027), said apparatus further comprising a Bluetooth device configured

Art Unit: 2614

for communicating to the Bluetooth device of the phone said detecting of said occurrence(25 Fig.1 para 0027).

Regarding claim 10, Fu teaches the system of claim 6, wherein the phone further comprises a global positioning system (GPS) unit(para 0028) for determining a street map location of the phone, the phone being further configured to augment the prerecorded message with said location(para 0029).

Regarding claim 11, Fu teaches the system of claim 6, wherein the pre-recorded message is a voice message and the playing of the message occurs on a voice channel(para 0029 and 0034-voice synthesis).

Regarding claim 12, Fu teaches the portable medical monitoring method comprising the steps of:

medically monitoring, with a portable monitoring device, to detect an occurrence of a predefined abnormal condition(Fig.1 and paragraph 0026-0027);

automatically, wirelessly and directly communicating, by a wireless transmitter attached to the device, the occurrence to a portable phone upon detection by the device of said occurrence(25 Fig.1 and para 0026-0027); and

making, by said phone, an emergency call upon receiving the communication(para 0026 and 0028).

Regarding claim 13, Fu teaches the method of claim 12, wherein the call making step further comprises the step of activating an automatic dialer in the phone to call a particular phone number (para 0026-0028).

Regarding claim 14, Fu teaches the method of claim 12, wherein call making step

Art Unit: 2614

comprises the step of playing, by said phone, a pre-recorded message on the call when the call is answered(para 0029 and 0034).

Regarding claim 15, Fu teaches a portable medical monitoring method comprising: medically monitoring, by a portable medical monitoring apparatus, to detect an occurrence of a predefined abnormal condition(Fig.1 and paragraph 0026-0027); upon detecting of said occurrence by said apparatus, activating an automatic dialer in the phone to call a particular phone number(para 0026-0028); and playing, by said phone, a pre-recorded message on the call when the call is answered(para 0029 and 0034).

Regarding claim 16, Fu teaches the method of claim 15, further comprising the step of automatically, wirelessly and directly communicating, by said apparatus, to the phone said detecting of said occurrence(25 Fig.1 and para 0027).

Regarding claim 17, Fu teaches the method of claim 15, wherein the monitoring is of a subject, the device being attached to the subject during the monitoring(10-20 Fig.1 and para 0026-0028).

Regarding claim 18, Fu teaches a portable medical monitoring apparatus comprising: a portable monitoring device for monitoring one or more medical conditions for the occurrence of one or more predefined abnormal conditions(20 Fig.1 and para 0027); a portable communication device for receiving a signal from the portable monitoring device that one of the predefined abnormal conditions has occurred(30 Fig.1 and para 0027-0028); wherein the portable communication device relays the occurrence of the predefined abnormal condition to one or more selected emergency contacts by providing a notification of the

Art Unit: 2614

occurrence of the abnormal condition that has occurred and a location of the of the portable monitoring device(para 0029).

Regarding claim 19, Fu teaches the portable medical monitoring apparatus of claim 18, wherein the location is defined by a global positioning system(para 0028-0029).

Regarding claim 20, Fu teaches the portable medical monitoring apparatus of claim 18, wherein selected locations can be predefined with location labels(para 0028-0029-attached GPS locator module has predefined location labels so emergency personnel can locate patient).

Regarding claim 21, Fu teaches the portable medical monitoring apparatus of claim 18, wherein the emergency contact that is closest to the location is notified first(para 0028-0029-appropriate 911 personnel is closest emergency contact).

Regarding claim 22, Fu teaches the portable medical monitoring apparatus of claim 18, wherein the notification comprises a telephone to the one or more emergency contacts including a selected, pre-recorded message(para 0029 and 0034).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOSEPH T. PHAN whose telephone number is (571)272-7544. The examiner can normally be reached on Mon-Fri 9am-6:30pm EST, off every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis Kuntz can be reached on (571) 272-7499. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
